## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 1 – 24 are allowed.

The following is an examiner's statement of reasons for allowance:

Roshitsh et al. shows a stackable RF switch assembly comprising an antenna interface port (127) and accessory port (125), the accessory port comprising a mechanical switched connection but does not teach or suggest the limitations of the independent claims such as, among other limitations of the independent claims, a plurality of switch contact structures comprising a cantilevered structure and a rotatable switch actuation member; comprising N connection members where N is greater than 2; or a multi-element back plane reflector second radio antenna member, where Roshitsh et al. does not teach or suggest the above limitations of the independent claims thus the claims are allowable.

Eichler et al. shows a coaxial antenna connection (Fig. 2) integrated with a portable unit (10) and similarly as in the case of Roshitsh et al. above, does not teach or suggest the limitations of the independent claims thus the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Roshitsh et al. shows a RF switch assembly.

Eichler et al. shows a coaxial antenna connection.
